

# Advances in Digital Dentistry

In Association with **Inter Chrome Dental Lab**

**Friday, November 2, 2018**

## PROGRAM DESCRIPTION

Digital dentistry is changing the way general dentists, surgeons, and laboratory technicians interact with one another and plan treatment. Incorporation of CAD/CAM technology for restorative solutions can help deliver natural-looking, esthetic results for patients. Connectivity between current CAD/CAM scanners and intra-oral scanners allows the restorative doctor to take a digital impression, make any occlusal modifications chairside, and send the file to the laboratory to design the restoration. This program will review recent advances in digital technology; the increasing importance of the partnership between the dentist and the lab; the differences between various materials used for copings and abutments; surgical planning software for implant placement and restoration; and the many benefits available to the treatment team when using digital dentistry solutions.

## LEARNING OBJECTIVES

- Recognize how to incorporate recent technological advances as part of the treatment plan
- Understand how digital impressions can help create an accurate final restoration
- Understand the materials and processes available for CAD/CAM restorations
- Identify cases where guided surgery planning would be helpful for implant placement

## SPEAKER

**Dr. Adam Hamilton** is a full time faculty member and lecturer in Advanced Graduate Implant Dentistry and the interim director of the Division of Regenerative and Implant Sciences at the Harvard School of Dental Medicine. He completed his general dental education at the University of Western Australia and has a Doctorate in Clinical Dentistry in the specialty of Prosthodontics from the University of Melbourne, Australia. He is a Fellow of the Royal Australasian College of Dental Surgeons and the International Team for Implantology (ITI). He was the recipient of an ITI scholarship through which he completed a Fellowship in Oral and Maxillofacial Surgery at University of Florida's Center for Implant Dentistry. He has conducted research into the fit of CAD/CAM implant abutments and has a special interest in dento-facial esthetics and implant rehabilitation of the edentulous patient. He also maintains a part time clinical practice focusing on prosthodontic and implant treatment at the Harvard Dental Center.
